

Sanlorenzo at Boot Düsseldorf with SD90

The entry level of the semi-displacement line is the star of the first boat show of the year

Press release, 17 January 2023 - Sanlorenzo returns to **Boot Düsseldorf**, Europe's leading "indoor" boat show dedicated to the nautical world, which will be staged from **21 to 29 January 2023**. With another year full of achievements accomplished and with many ambitious goals set for the near future, Sanlorenzo presents itself at the first event of the year, bringing to the show one of its latest models, which debuted at Cannes 2022 and is among the most important innovations of the yacht fleet: **SD90**. This yacht is the result of a strategy that is firmly rooted in the past but which looks to the future of the nautical sector with the commitment and determination necessary to make it even better.

SD90 is a 28-metre yacht, the entry level of the SD line, which is **revolutionary** in many respects: from the efficacy of the hull, designed in collaboration with **Philippe Briand**, to the materials chosen for the interior finishes, aiming **at transversal technological efficiency**. **Zuccon International Project** has designed the exterior lines of this model, introducing innovative solutions both internally and externally to guarantee maximum liveability of the yacht, while **Patricia Urquiola** conceived the interior design from a **green** perspective, with an approach closely linked to flexibility and transformability.

In 2023 **Sanlorenzo** is **Project Partner of the Blue Innovation Dock**, the Boot Düsseldorf platform that brings together visionaries, investors and prominent figures to prepare the nautical industry for a future linked to sustainability, the climate and the development of responsible solutions for materials, propulsion and more.

TECHNICAL DATA

Length overall: 27.43 m

Beam: 23.97 m

Guest berths: 8 persons

Crew berths: 4 persons

Engines: a) 2 x MAN I6 (800 HP) / b) 2 x CAT C18 (1150 HP)

Maximum speed: a) 14 kn / b) 17 kn

Cruising speed: a) 12 kn / b) 15 kn

Fuel tank capacity: 13000 l

Water tank capacity: 2000 l

Tender length: max. 4.35 m
